MPDD Database Release Agreement
NON-EXCLUSIVE LICENSE AGREEMENT

This Non-Exclusive License Agreement (hereinafter referred to as "Agreement") is entered into by the Human-centered Affective Computing and Interaction (HACI) research group of the Sydney Smart Technology College (SSTC) at Northeastern University (NEU) (hereinafter referred to as "Licensor") and _____
_____ (*please insert the name of your research group or laboratory here*, hereinafter referred to as "Licensee").

The MPDD database (hereinafter referred to as "Database") has been developed and maintained by the HACI research group of NEU-SSTC. The Database is designed to support academic research in the development, testing, and evaluation of early depression detection algorithms. It consists of two subsets: MPDD-Elderly and MPDD-Young. Each subset includes audio, visual data, and corresponding annotation files, and is strictly for academic research use. As the technical agent for the release of the Database, the Licensor retains copyright over all data and related files within the Database, including but not limited to all visual and audio data, extracted features, and annotated text files.

Researchers seeking access to the Database must sign this Agreement and commit to complying with the terms and conditions set forth herein. Any breach of this Agreement entitles the Licensor to deny the Licensee access to future versions of the Database and to pursue legal remedies for unauthorized disclosure or publication of the data or annotation files, including potential civil liabilities. Pursuant to this Agreement, the Licensor grants the Licensee the following rights and obligations:

1. The Licensor grants the Licensee a non-exclusive, non-transferable, revocable, and limited license. The Licensee may use the Database solely *for academic research purposes and must not utilize it for any commercial purpose*.

2. *The data within the Database, including but not limited to audio data, visual data, extracted feature files, and textual annotation files, must not be used in any form for commercial publications, newspapers, or other public media*. The use of the Database is strictly confined to academic research activities.

3. *The Database, in whole or in part, may not be used for any commercial purpose*, including but not limited to sale, product promotion, training of algorithms or technologies intended for commercial use, or integration into or sale as a commercial product.

4. *The Database must not be redistributed, published, duplicated, or disseminated in any form or manner, whether for profit or non-profit purposes*. This includes sharing, copying, or distributing the data to different departments or organizational units within the Licensee's institution or organization. *Without prior written consent from the Licensor, the Licensee shall not create or authorize others to create copies of the Database, in whole or in part, nor sublicense or provide the Database to third parties*.

5. *The Licensee must ensure that the use of the data does not involve or disclose personally identifiable information, whether extracted individually or in combination* with other materials, such as images, texts, content analyses, summaries, or interpretations.

6. Upon request by the Licensor, the Licensee must provide (and, where applicable, ensure that subcontractors and agents also provide) reasonable access to the Licensor, including access to relevant processes and systems used by the Licensee or any sublicensed party for processing the Database, *to enable the Licensor to audit the usage of the Database under this Agreement*.

7. The Licensor retains the sole authority for the final interpretation of this Agreement.

This Agreement becomes effective upon signature by the Licensee. During the term of this Agreement, the Licensor reserves the right to modify or terminate the Agreement at any time. Upon termination of this Agreement, the Licensee shall cease using the Database and delete all copies in their possession.
